## MARK RODERICK I. SALISE

**OBJECTIVES** To leverage expertise in full-stack development at the intersection of AI, blockchain, and user experience by building secure, scalable, and user-centric solutions. To apply proven experience in developing document verification systems with Hyperledger Fabric and AI-powered platforms using FastAPI and React that automate workflows and enhance data accuracy. To contribute to collaborative teams by navigating technical conflicts through Agile practices, clear communication, and a strong commitment to innovation.

**PERSONAL INFO**

Date of Birth	:	September 8, 2002
Place of Birth	:	San Pedro, Laguna
Age	:	23 years old
Height	:	5 feet 10 inches
Weight	:	85 kg
Civil Status	:	Single
Religion	:	Catholic

**SKILLS & ABILITIES** Machine Learning Blockchain Development  
API Development Document Processing

**EXPERIENCE** **HYPERLEDGER BLOCKCHAIN SYSTEM – ALUMNI DOCUMENT VERIFICATION**

- Developed a blockchain-based Alumni Profile and Document Verification System using Hyperledger Fabric as my undergraduate thesis.
- Implemented permissioned blockchain architecture to ensure secure, tamper-proof graduate records.
- Integrated smart contracts and RESTful APIs for managing and validating credentials.

**AI-POWERED DOCUMENT INTELLIGENCE PLATFORM – CLOUDCOMM**

- Built an end-to-end AI system for document OCR, NLP, and classification using FastAPI, PyMuPDF, pytesseract, and Transformers.
- Designed ETL pipelines with SQLAlchemy, file-based caching, and deployed services with Docker and AWS.
- Managed the frontend with React + TypeScript, using Context API for scalable state management.

**FULL-STACK WEB PROJECTS & COLLABORATION**

- Led and contributed to frontend and backend features in team-based projects, including upsell initiatives and UI/UX redesigns.
- Applied Agile workflows using tools like Asana, GitHub, and Figma to deliver client-focused results.
